

I understand that the FCC accepts comments on how radio and TV are serving communities throughout the United States.

I am very concerned that Sinclair Broadcasting is not serving our democracy. Sinclair's decision to force their stations to air an anti-Kerry document before the election is an example of how the consolidation of the media is hurting our democratic society.

Since the airways belong to the Public and Sinclair uses the airwaves free of charge, it is obligated by law to serve the public. It is imperative that Americans see real people from their own communities and receive news about issues that concern them.

We need to strengthen the ownership rules of the media. We cannot allow Sinclair to weaken them. The FCC has the power to stop Sinclair. The license renewal process needs to be tightened and overhauled. Thank you!
